Pent-Up Demand & the Power of Major Tradeshow Brands

The postponement of Vitafoods Europe was amongst the most acute indicators that 2020 would unfold differently than planned. It's been imperative to structure continuous business as best we can until normality returns later in the year—including the resumption of tradeshows where we conduct a good deal of our business.

We really miss the buzz that surrounds these exhibitions. It is an unusually long time for us not meeting with customers... The virus has affected face to face communications globally and so it becomes even more important how tradeshows are needed to help businesses

Preparations for Jewellery & Gem World Hong Kong in September – the biggest and most important marketplace of its kind in the world – have been in full swing for months – even shifting into higher gear during the last three weeks. As of today, we have sold nearly the same amount of exhibition space compared with the same period last year – and we are signing up new and returning exhibitors every day. This is a strong indication of just how driven our customers are in terms of capturing the massive amount of pent-up demand that has been deferred since February of this year.

Unfortunately there is no real replacement for the many nuances of true, in-person contact. Licensing Expo is the largest physical manifestation of the marketplace of ideas that IS the licensing business. As you all know, many of the best ideas and relationships are spawned by the casual conversation at a networking reception, on the Starbucks line, over dinner, across a meeting table where the slightest bit of body language can speak volumes more than a well-delivered email or phone pitch. Because of this, we eagerly await the chance to come together, collaborate and share at Expo late this summer.

Cash collections across all of Informa's business in China are resuming, with total March collections 4x larger than February

The industry has warmly welcomed the postponement of China Beauty Expo to later in the year. As soon as the news came out, some leading exhibitors also expressed their wish to expand booth participation since they expect a strong rebound in China during the second half of the year.
